The NEW Korean Chrysanthemum

(Chrysanthemum Coreanum)

A remarkable new perennial of iron-clad hardiness from Korea, forming fine, large clumps 2 to 3 feet in both height and diameter. The large white flowers have golden centers, resembling a glorified Oxeye Daisy; the petals often turning to a light claret pink. It blooms in the greatest profusion in late October to early December, and is destined to become a profitable cut flower subject for the florist. Excellent one-year-old plants from 2½-inch pots, \$7.00 per 100, \$60.00 per 1000.

The New Balcony Chrysanthemum

A wonderful introduction that is certain to become very popular for both forcing in pots under glass and for outside planting in the garden. Instead of growing upright, this plant produces long, drooping spikes, with flowers about the size of a Climax Aster, in delicate shades of pink, rose, yellow, and white. Should be grown in a hanging basket or in a pot set high to allow the plant to develop to full beauty. \$0.85 per 12; \$6.00 per 100.

The New and Better Dahlias

Sturdy green plants that will give better results than tubers. Ready April 1st. Note reasonable prices. Refer to G. & R. "Blue Book For Florists" for complete descriptions and a more complete list of varieties.

MARK HANNA (Good & Reese, 1930):

A new Decorative Dahlia that is without question the best red Dahlia on the market today. No Dahlia in our fields has ever attracted more attention, and elicited more worthy comment, than Mark Hanna. The flowers are of the same shade as the popular Richard Geranium—brilliant vermilion red. The plant is sturdy and of tall growth. Mark Hanna easily attains a diameter of 12 to 13 inches across when properly grown. Mark Hanna is a Dahlia that is destined to rank among the world's finest. It is the par excellence of red Dahlias

New Buddleia Alternifolia

This is the hardest "Butterfly Bush" yet introduced. Only once in a lifetime do we find a new shrub of so outstanding merit as this. While other Buddleias freeze down to the ground every winter, and during the summer grow to a height of five or six feet, being too large for a perennial border and not suitable for among shrubs, this wonderful new Buddleia DOES NOT FREEZE DOWN in the winter, but is just like other shrubs, filling a long-wanted place for Buddleias. It is a very distinct and charming sight while in bloom, with its long arching or pendulous branches covered with clusters of lilac-purple flowers from mid-summer until late fall.

Strong plants from 2-inch pots, \$1.20 per 12, \$8.00 per 100.

Ferns

Nephrolepis Varieties

	Per 12	Per 100	Per 1000
2 1/4-inch pots	\$1.00	\$6.50	\$60.00

TEDDY JUNIOR (The Fern for Every Household)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from *Nephrolepis Scholzei*, with longer, narrower gracefully drooping fronds. It is not so compact in growth as *Scholzei*, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other *Nephrolepis*.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

WHITMANII (The Ostrich Plume Fern)—The well-known fluffy leaved fern; a popular florists' variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are super-imposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZELI ("The Crested Fern")—The fronds, like *Scottii*, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

DWARF BOSTON—The most popular of present day ferns. A dwarf type of the popular Boston variety.

GOODI ("The Baby's Breath Fern")—(Good & Reese.) This fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house fern. This has always been a favorite.

The Fluffy Ruffles Fern

N. Superbissima

We have a limited but excellent stock of this rare fern. Its distinguishing characteristics are its dark green foliage, darker than that of any other fern, its dense, compact growth, and its irregular shaped fronds. It is the most beautiful of all ferns.

The New Fern Colorado

The most beautiful fern sent out in years. It has proven itself much truer to form than any other fern of this type. It is an improvement on *Whitmanii*, as hardy and sturdy as the Boston, a faster grower than any other fern and makes a better formed plant.

New Oriental Poppies

Spring delivery from 2¼-inch pots

No flower can draw more instant attention and leave a more lasting and pleasing impression than a bed of carefully selected Oriental Poppies. Either singly, or in mass, they give a touch of barbaric splendor offered by no other flower. For five years we have been carefully selecting new and better varieties which show superior merit and advancement over older types. For the first time, we are in position to offer in quantity a selected list of new varieties, each one of which is distinctly superior.

LULA A. NEELEY—This variety is our favorite. Good strong stems support flowers of brilliant oxblood red, the color holding until the last. We predict that this variety will become the most popular Poppy in America within a few years. \$1.50 per 12, \$10.00 per 100.
